

April 17, 1973

then 43A follows it, it seems to me like both of them have a fiscal impact, both 43 and 43A and therefore both of them should not be voted upon in accordance with the amendment--or with the motion and so I would like to know whether I'm correct in this interpretation and we should have a ruling from somebody on this.

SPEAKER: Senator Schmit.

SENATOR SCHMIT: (mike off)--Members of the Legislature, I think there's a distinct difference between what Senator Stull referred to and what Senator Warner originally intended. LB 496A is an A bill but it does not have a fiscal impact. It's reappropriating cash funds. I have an amendment which I'm going to place on that bill which will reappropriate those funds from the Legislative Council which we have over the years, very frugally accumulated through Mr. Gerdes' good management and which will, I believe revert to the general fund if we do not reappropriate those. They will have no fiscal impact upon the budget and they should be reappropriated and therefore, I have that amendment on the bill and I don't see anything wrong or anything inconsistent in asking that that amendment be attached when the proper time comes and I would hope that Senator Stull's motion and I do not think that he intended to exclude those bills which do not raise the dollar impact on-- of the Governor's budget and I would hope that others will rise and speak to this.

SPEAKER: Senator Marvel.

SENATOR MARVEL: I thought to take 43, to take Senator Stull's 43 if that's the bill he's interested in. We had this discussion on the floor. You can't vote for 43 without voting for 43A, and 43 has fiscal impact and 43A passes the bill that appropriates the money so as I understand his motion, any bill that has any kind of fiscal impact whether it's an A bill or a bill by itself, would be excluded. Now Senator Warner doesn't understand it that way so I would suggest to you that according to your motion, you--we can't vote on either 43 or 43A. That was my understanding, that was the discussion.

SPEAKER: Senator Cal Carsten. He passes. Senator Syas.

SENATOR SYAS: I would like--I would appreciate getting something done. We've, we've now wasted 50 minutes and I just figure that we should bring this to a head and--50 minutes wasted, I suppose we'll waste the rest of the morning on this one technicality. Let's get going.

SPEAKER: Senator Chambers.

SENATOR CHAMBERS: Mr. Speaker and Members of the Legislature. I, I have got a motion on the desk. I would have offered it as a substitute motion but I thought it might have caused confusion. It's difficult to get a fix on exactly what's to be voted on this morning because the real issue is not whether we're voting on bills with a fiscal impact contained in the bill itself or whether we're going to vote on a bill which has to carry an A bill to appropriate money. We're voting on the issue that we discussed yesterday on whether or not we're going to pass the Governor's budget bill and then cut out of here Friday or earlier if possible, so when we have these two conflicting considerations in our mind, the vote green or red may not be for the bill or for the other situation so the motion that I had and I'm not discussing that motion now, but I think it ties in with what's going on here. I think we ought to just consider bills, all bills on final reading as they come up regardless of whether they have fiscal impact, whether they
